## **DETAILED ACTION**

### ***The Information Disclosure Statement***

The prior art cited in the information disclosure statement filed on May 22, 2008 has been considered.

### ***Allowable Subject Matter***

### ***Examiner's Statement of Reasons for Allowance***

The following is an examiner's statement of reasons for allowance:

As to independent claim 1, the prior art of record, taken alone or in combination, fails to disclose or render obvious a system for collecting biological information on a dyed biological particle by irradiating light onto liquid containing the dyed biological particles and detecting information light therefrom comprising a cylindrical container having a laminar-flow generating chamber provided upstream the flow path; a sheath-fluid line for supplying sheath fluid constituting a main body of the liquid from an upper end of the cylindrical container; a suspension-fluid tube arranged along the central axis of the cylindrical container for supplying suspension fluid containing the particles into the sheath fluid running within the laminar-flow generating chamber; and a mechanism for adjusting at least one of a position and an angle of a suspension-fluid outlet of the suspension-fluid tube, in combination with the rest of the limitations of the claim.

As to independent claims 4, 8, 15 and 20, the prior art of record, taken alone or in combination, fails to disclose or render obvious the claimed invention for the reasons set forth in the first, second, third and fourth paragraphs, respectively on page 6 of the previous Office action.

As to independent claim 17, the prior art of record, taken alone or in combination, fails to disclose or render obvious a system for collecting biological information on a dyed biological particle by irradiating light onto liquid containing the dyed biological particles and detecting information light

therefrom comprising a cylindrical container having a laminar-flow generating chamber provided upstream the flow path; a sheath-fluid line for supplying sheath fluid constituting a main body of the liquid from an upper end of the cylindrical container; a suspension-fluid tube arranged along the central axis of the cylindrical container for supplying suspension fluid containing the particles into the sheath fluid running within the laminar-flow generating chamber; a mechanism for adjusting a position of a suspension-fluid outlet of the suspension-fluid tube; a drain line connected with a lower end of the laminar-flow generating chamber; a sheath-fluid source of the sheath fluid; a sheath-fluid waste of the sheath fluid; and means for selectively connecting the drain line with either one of the sheath-fluid source and the sheath-fluid waste, in combination with the rest of the limitations of the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
